William lives in a street with house-numbers 8 up to 100. Lisa wants to know at which number William lives. She asks him: "Is your number larger than 50?"
William answers, but lies. Upon this, Lisa asks: "Is your number a multiple of 4?"
William answers, but lies again. Then Lisa asks: "Is your number a square?"
William answers truthfully. Upon this, Lisa says: "I know your number if you tell me whether the first digit is a 3."
William answers, but now we don’t know whether he lies or speaks the truth. Thereupon, Lisa says at which number she thinks William lives, but (of course) she is wrong.

**The Question:** What is William’s real house-number?
