

Tagset for the constituency annotation of **Cat3LB** corpus

Here comes a description of the tagset used in the annotation of Cat3LB. For a more detailed description, please refer to the annotation guidelines:

Valverde, P., M. Civit i N. Bufí (2004) *Guia per a l'anotació sintàctica de CAT3LB: un corpus del català amb anotació sintàctica, semàntica i pragmàtica. Report Intern*

Warning! Discontinuity in the constituent annotation is a bit different from what the guidelines state. There is no mention in the guidelines about the .1n and .1c suffixes (there is only mention about .1 suffix). .1n stands for the head, and .1c for the modifier of a discontinuous structure. If there is more than one case of discontinuity, the second gets .2 suffix.
